Bangkok, Thailand, also known as the "City of Angels", is a romantic and fascinating city. Whether you want to visit major attractions or have an internal dialogue with your subconscious mind while travelling, the city will help you meet all your expectations and goals.

As a tourist destination, Bangkok, with its unique charm, is definitely on the list of must-go places for most people. The 2019 edition of the Asia Pacific Destinations Index report, published by Mastercard, selected Bangkok as the most popular tourist destination, followed by Singapore, Kuala Lumpur, Tokyo and Seoul, among 161 cities in the Asia Pacific region. Thailand has also ranked No.1 for nine consecutive years. This time, it stood out from many cities with 22.8 million international tourists, and was even far ahead of Singapore, the second place, with 14.7 million international tourists.

On the economic front, Thailand also serves as a transportation hub, with complete infrastructure, abundant natural resources, and various favorable conditions that make Thailand the second largest economy in ASEAN. As the capital, Bangkok is definitely Thailand's most important political and economic center. Bangkok's economy accounts for about 40% of Thailand's total economy. It can be said that the development of Bangkok directly represents the prosperity of Thailand. In recent years, work patterns have changed due to the rapid changes in technology. ^{*}The Digital Nomad has emerged and is gradually becoming a trend in countries around the world. According to the Nomad List, a foreign digital nomadic information platform, Bangkok, Thailand ranked seventh among the "Best Cities to Live" in terms of quality of life, cost of living, entertainment, safety, happiness index, freedom of speech, and Internet speed. Regardless of the cost of living, its quality of living and the entertainment are quite prominent.

While the COVID-19 pandemic has adversely affected Thailand's tourism and export industries, epidemic control in the country has improved. Also, the continuous development of large-scale infrastructure has helped Thailand continue to boost its national economic strength. Although the international economic outlook is full of uncertainties, as one of the largest economies in Southeast Asia, Thailand's future development is still worthy of attention.

Contrary to the stereotype of Southeast Asia in the past, Bangkok, Thailand is now an international metropolis with numerous high-rise buildings. However, in this hustle and bustle city, there is still much original scenery. Although the sun rises every day, this oriental city with a quaint atmosphere as well as modern style never rests at sunset and silently and tirelessly exude endless charm.

^{*}Digital Nomad refers to workers enabled by the convenience of technology, through notebook computers and mobile devices, so that the workplace and work hours are not restricted. This makes it possible to combine remote work and travel.
